Description

During implementation of the Almirah gem (#8) the following was observed

The line:

"| Item Id | Unique identifier for a paragraph in the specification document defined in the following form "[AAA-NNN]", where AAA - is any combination of leters and NNN - is the number."

is not closed with a bar "|"

As the result Almirah gem parse the document incorrectly.

Suggested actions: Update SRS specification to:

1. Close the line with bar "|"
2. Correct the word "leters" to "letters"
